Power your Growth

Course Description: An 11 module course to learn to do creative tasks with Artificial Intelligence (AI). Learn graphic design, videos, music, writing, presentations, website design and social posts with AI. Learn the power of AI, what you can do with it and how to use AI better, safely and ethically.

Course Modules:

1. Introduction to AI & Data Science:

Gain foundational knowledge of artificial intelligence and data science.

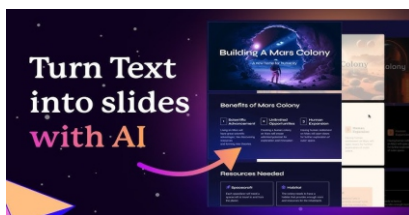

2. Prompt Intelligence:

Develop skills to interact intelligently and collaborate with AI systems to get the best output.

3. Research & Creative Writing:

Learn techniques to conduct research and craft compelling written content with AI.

4. Presentations & Website Designs:

Create engaging presentations for projects and design user-friendly websites.

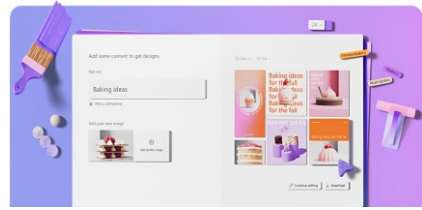

5. Graphics Design with AI:

Master the art of designing visually appealing graphics to use in your digital designs.

6. Voice and create social media posts:

Leverage voice technology for podcasts & presentations and learn to create social media posts with basic AI tools.

7. Create your own AI Avatar:

Learn to design and personalize AI avatars who can be your video hosts.

8. Create Videos with text prompts:

Learn to generate engaging videos using text prompts and AI-powered tools. Create ads and short instructional videos using this.

9. Learn to dub multi-language videos:

Seamlessly dub videos into multiple languages using AI technology, enhancing accessibility and reach at low or no cost.

10. Write and compose music with AI:

Unlock magical new possibilities for musical expression by using AI tools for writing, composing & mixing music.

11. Ethics and Safety with AI:

Delve into the ethical considerations and safety protocols surrounding the development, deployment, and usage of AI technologies.
